This is sample text and needs to be completely replaced before submitting your paper. This is sample text and needs to be completely replaced before submitting your paper.

Key Words: Bayesian, parametric, p-value, ICES

1. Primary Subhead

You are eligible to publish in the proceedings if you orally presented your paper in an invited, topic-contributed, or contributed session. Discussants and IOL and plenary session presenters may submit a paper for the proceedings, as well. If your paper was withdrawn or not orally presented, it is not eligible for publication in the proceedings.

The page limit is 15 pages. This includes keynote addresses, introductory overview lecture papers, invited papers, contributed/topic-contributed papers, discussant papers, end panelist papers, and summary of end panel discussion.

The website will be open for submissions until September 30, 2021, at 11:59 p.m. EDT. Submit early. You can expect delays due to heavy volume around the deadline. This is sample text and needs to be completely replaced before submitting your paper. This is sample text and needs to be completely replaced before submitting your paper. This is sample text in 10-point Times New Roman type[1] and needs to be completely replaced before submitting your paper. This is sample text and needs to be completely replaced before submitting your paper.

Table 1: Possible Rankings of A, B, and C and Corresponding Posterior Probabilities
(Because of rounding, not all columns sum to one.)

(R_A, R_B, R_C)	Errors $g(\boldsymbol{R})$	Posterior probability as a function of β	Posterior probability for specified β			
			$\beta = .5$	$\beta = .3$	$\beta = .1$	$\beta = .01$
(1, 2, 3)	0	$1/(1+2\beta+2\beta^2+\beta^3)$	.381	.553	.819	.980
(1, 3, 2)	1	$\beta/(1+2\beta+2\beta^2+\beta^3)$	.190	.166	.082	.010
(2, 1, 3)	1	$\beta/(1+2\beta+2\beta^2+\beta^3)$	.190	.166	.082	.010
(2, 3, 1)	2	$\beta^2/(1+2\beta+2\beta^2+\beta^3)$	.095	.050	.008	.000
(3, 1, 2)	2	$\beta^2/(1+2\beta+2\beta^2+\beta^3)$	.095	.050	.008	.000
(3, 2, 1)	3	$\beta^3/(1+2\beta+2\beta^2+\beta^3)$	.048	.015	.001	.000
